Sri Lanka Institute of Information Technology

IT2130 – Operating Systems and System Administration
Year 2, Semester 2- 2026

Practical Answer Submission

Practical Sheet No: 01

Student ID	IT24101365
Student Name	Kamshiga Ganesan
Campus/ Center name	SLIIT Northern UNI
Specialization	Software Engineering
Batch No	1

Activity 1

Write a C program to display your name, country and the university in the format below.

```
kamshiga@kamshiga-VirtualBox: ~
  GNU nano 7.2                                    a1.c
#include <stdio.h>
int main()
{
  printf("***************************\n");
  printf("Kamshiga Ganesan\n");
  printf("Sri Lanka\n");
  printf("SLIIT\n");
  printf("***************************\n");

  return 0;
}

                                    [ Read 11 lines ]
^G Help      ^O Write Out   ^W Where Is    ^K Cut       Execute     ^C Location
^X Exit      ^R Read File   ^\ Replace     ^U Paste     Justify     ^/ Go To Line
```

```
kamshiga@kamshiga-VirtualBox: ~

kamshiga@kamshiga-VirtualBox:~$ nano a1.c
kamshiga@kamshiga-VirtualBox:~$ gcc -o a1 a1.c
kamshiga@kamshiga-VirtualBox:~$ ./a1
***************************
Kamshiga Ganesan
Sri Lanka
SLIIT
***************************
kamshiga@kamshiga-VirtualBox:~$
```

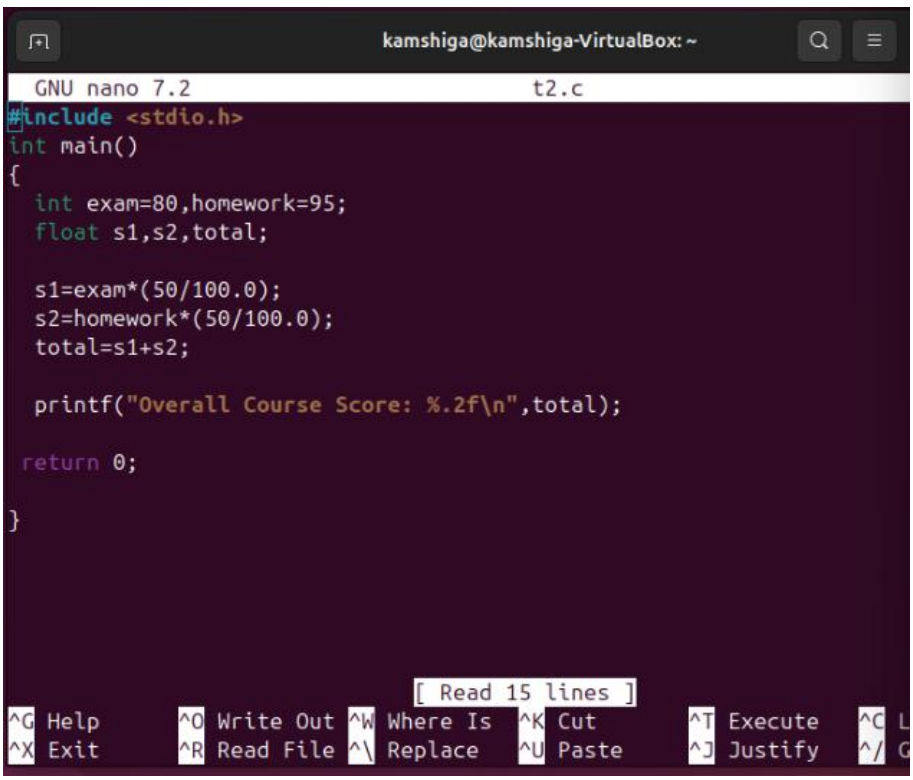
Activity 2

Write a C program that reads the marks obtained for an exam and homework, each out of 100. The final course score is calculated by taking 50% of the exam marks and 50% of the homework marks.

Use the following formula:

- Score1 = exam_marks × (50 / 100.0)
- Score2 = homework_marks × (50 / 100.0)
- Overall_Score = Score1 + Score2

Display the calculated overall course score.



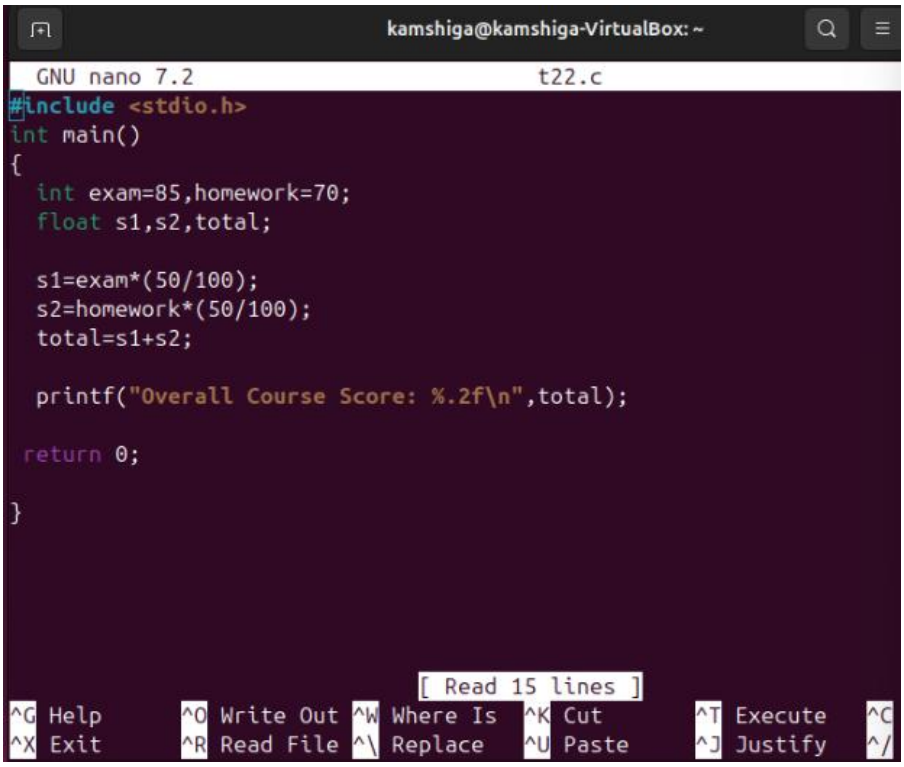
```
kamshiga@kamshiga-VirtualBox: ~
kamshiga@kamshiga-VirtualBox:~$ nano t2.c
kamshiga@kamshiga-VirtualBox:~$ gcc -o t2 t2.c
kamshiga@kamshiga-VirtualBox:~$ ./t2
Overall Course Score: 87.50
kamshiga@kamshiga-VirtualBox:~$
```

Activity 3

Change the program you wrote in above activity 2 with the formula below.

- Score1 = exam_marks × (50 / 100)
- Score2 = homework_marks × (50 / 100)

Observe the output and explain the reason for the observation



```
kamshiga@kamshiga-VirtualBox: ~
kamshiga@kamshiga-VirtualBox:~$ nano t22.c
kamshiga@kamshiga-VirtualBox:~$ gcc -o t22 t22.c
kamshiga@kamshiga-VirtualBox:~$ ./t22
Overall Course Score: 0.00
kamshiga@kamshiga-VirtualBox:~$
```

Activity 4

Write a C program to calculate the summation of two integer values that input from the keyboard

```
kamshiga@kamshiga-VirtualBox: ~
  GNU nano 7.2                                    a3.c
#include <stdio.h>
int main()
{
  int a,b,sum;

  printf("Enter first number: ");
  scanf("%d",&a);

  printf("Enter second number: ");
  scanf("%d",&b);

  sum=a+b;
  printf("Summation of two integer: %d\n",sum);

  return 0;

}

                                  [ Read 17 lines ]
^G Help      ^O Write Out   ^W Where Is   ^K Cut       ^T Execute    ^C Location
^X Exit      ^R Read File   ^\ Replace    ^U Paste     ^J Justify    ^/ Go To Line
```

```
kamshiga@kamshiga-VirtualBox:~$ nano a3.c
kamshiga@kamshiga-VirtualBox:~$ gcc -o a3 a3.c
kamshiga@kamshiga-VirtualBox:~$ ./a3
Enter first number: 12
Enter second number: 20
Summation of two integer: 32
kamshiga@kamshiga-VirtualBox:~$
```
